Text :

The aim in life is very important. Everyone has this aim or ambition and wants to achieve it in order to give himself the direction for a suitable career; but this comes after sacrifice and long studies.(1)

My aim is to be a doctor. It's a noble job. The doctor is a saver of life. The service of doctor is valuable service to the suffering humanity. He shows the hope and joy to the poor and needy people. I know , it's hard to be a doctor and is not a very easy task but if I can fulfil this dream, I'll be very kind to these sick and helpless people.(2)

Now, I'm in school. I'm having a confidence in myself to finish my target and reach my goals. I'll study hard until I get all my final exams. After that, I'll give the competitive tests for admission to a good and reputed medical college. I'll always try to be a good and sincere student and then a qualified doctor.

After becoming a successful doctor, I'll set up a clinic in a village and work for the people located in rural areas to develop their health care, their proper sanitation and maintain their hygiene and cleanliness.(3)

I will not charge any fee from them and money will never be my main aim. Helping the helpless will be my duty and practice. I'll never lose my heart.

I hope my dream will come true. (4)
